

Task Description

Question:

Create a Logic for the Game called Rock , Paper , Scissor.

Once it has generated by the system randomly then it has to compare the data with

The user must provide the data within the stipulated time duration.

If it hasn't happened then it automatically throws an Output as "System Wins"

Else: "User takes the Glory"

```
1 public class Sample extends Thread{
2
3     @Override
4     public void run()
5     {
6         for(int i = 1 ; i <= 5 ; i ++){
7             try{
8                 Thread.sleep(1000);
9                 System.out.print(i);
10            }
11            catch (Exception e){}
12        }
13    }
14 }
15
16
```
