

QUESTION 1:

package name: org.india

Project name: SouthIndia

Class name : India

Methods : india

package name: org.tamilnadu

Project name: SouthIndia

Class name : Tamilnadu

Methods : tamilLanguage

package name: org.kerala

Project name: SouthIndia

Class name : kerala

Methods : malayalam

package name: org.andrapradesh

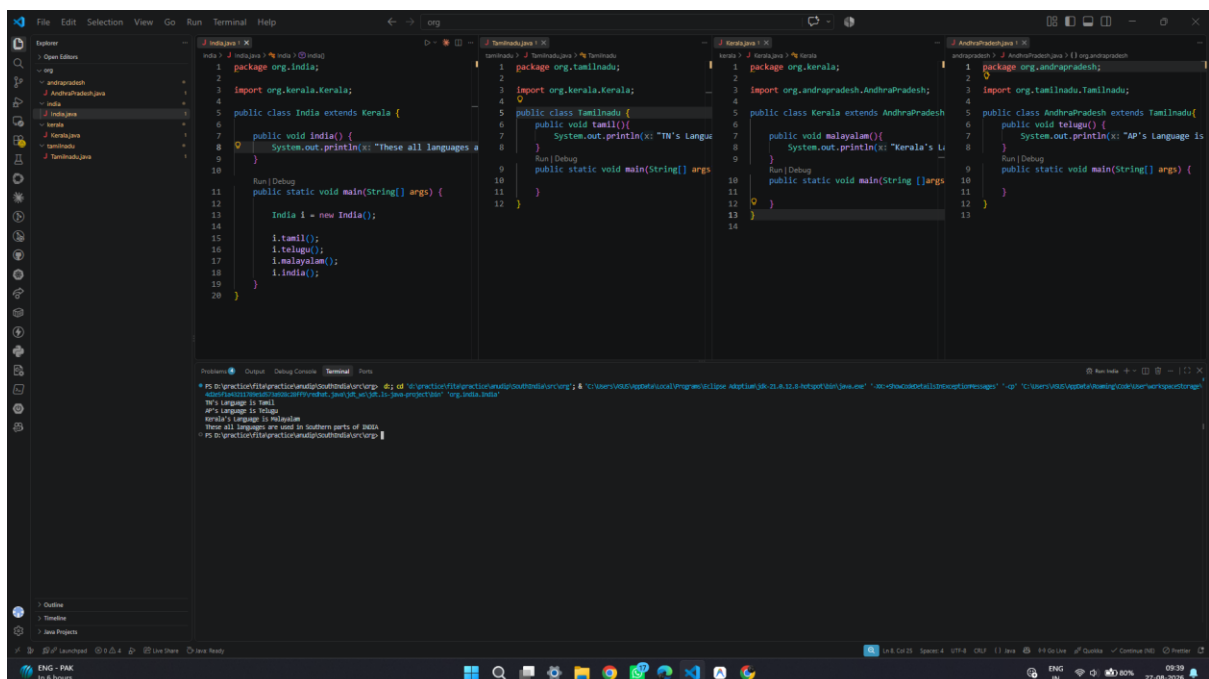

Project name: SouthIndia

Class name : AndhraPradesh

Methods : telugu

Description:

create above 4 packages and call all your class methods into the India using multilevel inheritance.

```
India.java
1 package org.india;
2
3 import org.kerala.kerala;
4
5 public class India extends Kerala {
6
7     public void india() {
8         System.out.println("These all languages are");
9     }
10
11     public static void main(String[] args) {
12         India i = new India();
13
14         i.tamil();
15         i.telugu();
16         i.malayalam();
17         i.india();
18     }
19 }

Tamilnadu.java
1 package org.tamilnadu;
2
3 import org.kerala.kerala;
4
5 public class Tamilnadu {
6
7     public void tamil() {
8         System.out.println("TN's Language");
9     }
10
11     public static void main(String[] args) {
12     }
13 }

Kerala.java
1 package org.kerala;
2
3 import org.andrapradesh.AndhraPradesh;
4
5 public class Kerala extends AndhraPradesh {
6
7     public void malayalam() {
8         System.out.println("Kerala's Language");
9     }
10
11     public static void main(String[] args) {
12     }
13 }

AndhraPradesh.java
1 package org.andrapradesh;
2
3 import org.tamilnadu.Tamilnadu;
4
5 public class AndhraPradesh extends Tamilnadu {
6
7     public void telugu() {
8         System.out.println("AP's Language is");
9     }
10
11     public static void main(String[] args) {
12     }
13 }

Output
PS D:\project\org\india> java org.india.India
These all languages are
TN's Language
Kerala's Language
AP's Language is
These all languages are used in southern parts of india
PS D:\project\org\india>
```

Project :CompanyDetails

Package :org.company

```
Class :Company
```

Methods :companyName()

```
Package :org.client
```

```
Class :Client
```

Methods :clientName()

Description:

create above 2 packages and call all your class methods into the Company using single inheritance.
