

QUESTION 1:

Description: Using Scanner class get the below details

empId
empName
empEmail
empPhoneno
empSalary
empGender
empCity

SOLUTION:

```
import java.util.Scanner;
```

```
public class Employee {  
    public static void main(String[] args) {  
        Scanner sc = new Scanner(System.in);  
        System.out.println("Enter the empId: ");  
        int empId = sc.nextInt();  
        sc.nextLine();  
        System.out.println("Enter the empname: ");  
        String empName = sc.nextLine();  
        System.out.println("Enter the empmailID: ");  
        String empEmail = sc.nextLine();  
        System.out.println("Enter the empphoneno: ");  
        Long empPhoneno = sc.nextLong();  
        System.out.println("Enter the empsalary: ");  
        int empSalary = sc.nextInt();  
        sc.nextLine();  
        System.out.println("Enter the empgender: ");  
        String empGender = sc.nextLine();  
        System.out.println("Enter the empcity: ");  
        String empCity = sc.nextLine();  
    }  
}
```

```
System.out.println(empId);

System.out.println(empName);

System.out.println(empEmail);

System.out.println(empPhoneno);

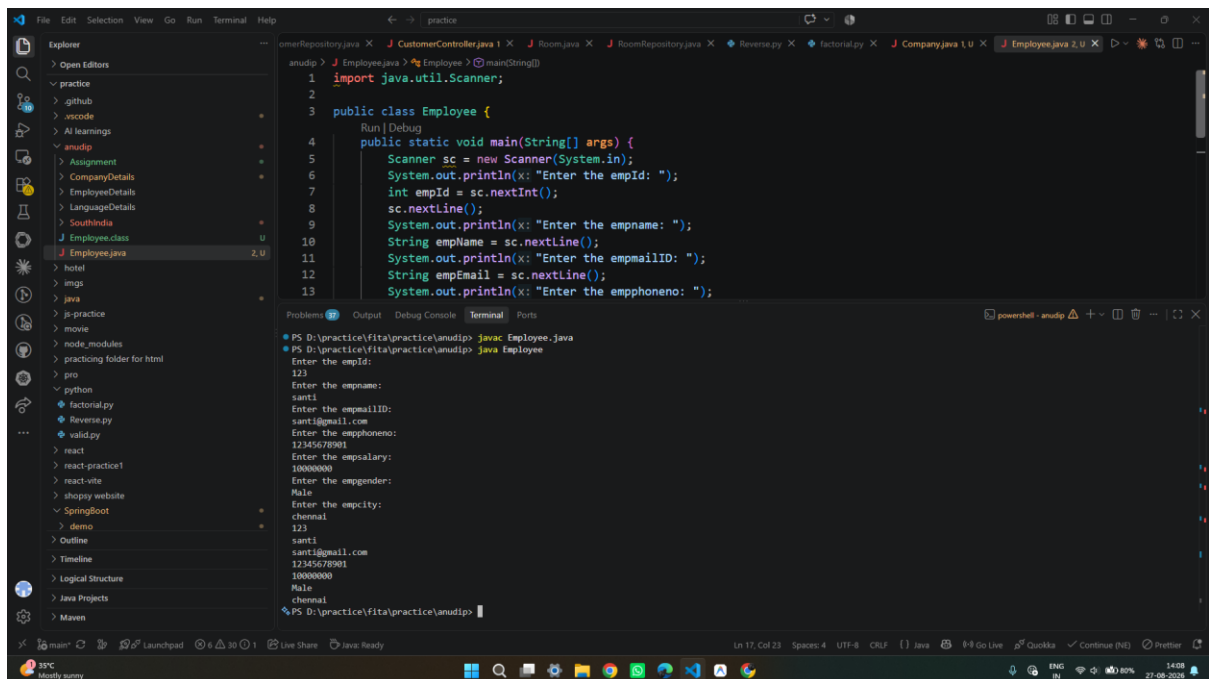

System.out.println(empSalary);

System.out.println(empGender);

System.out.println(empCity);
```

```
}
```

```
}
```

QUESTION 2:

Description: Using Scanner class get the below details

studentId

studentName

Mark1

Mark2

Mark3

Mark4

Mark5

:Find the total and average of marks

Solution:

```
import java.util.Scanner;
```

```
public class Total {  
    public static void main(String[] args) {  
        Scanner sc= new Scanner(System.in);  
        System.out.println("Enter studentId");  
        int studentId = sc.nextInt();  
        sc.nextLine();  
        System.out.println("Enter studentname");  
        String studentName = sc.nextLine();  
        System.out.println("Enter Mark1");  
        int Mark1 = sc.nextInt();  
        System.out.println("Enter mark2");  
        int Mark2 = sc.nextInt();  
        System.out.println("Enter mark3");  
        int Mark3 = sc.nextInt();  
        System.out.println("Enter mark4");  
        int Mark4 = sc.nextInt();  
        System.out.println("Enter mark5");  
        int Mark5 = sc.nextInt();  
  
        int Total = Mark1+Mark2+Mark3+Mark4+Mark5;
```

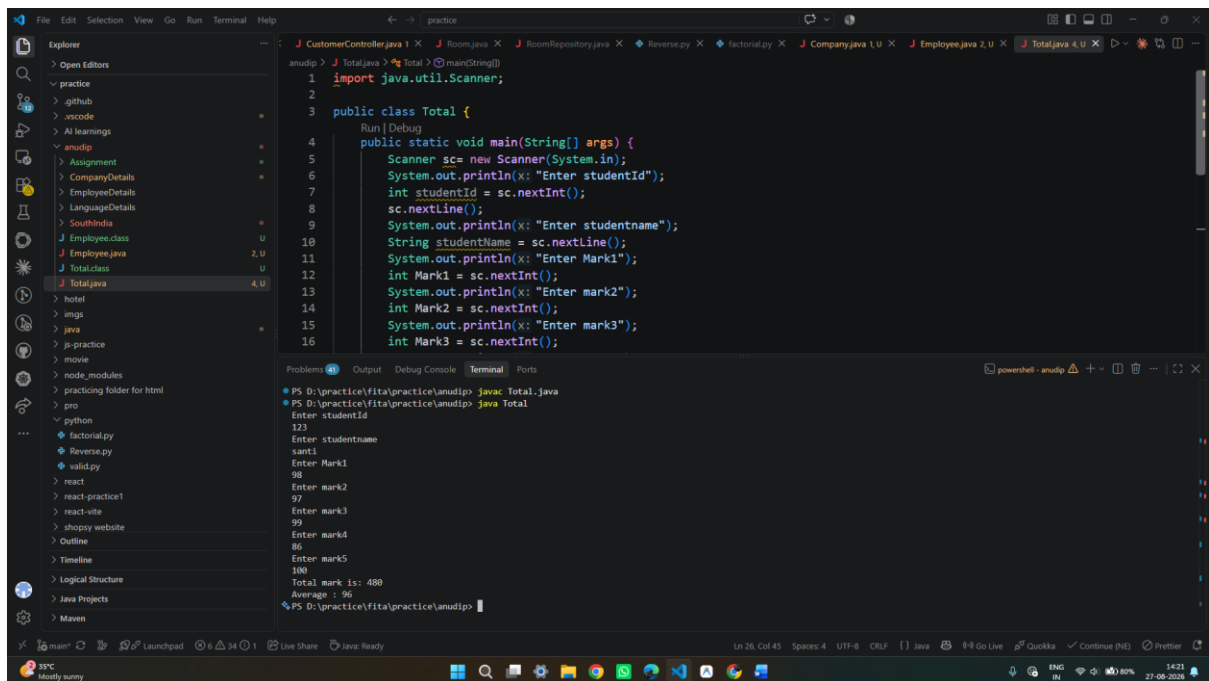

```
System.out.println("Total mark is: " +Total);
```

```
int avg = Total / 5;
```

```
System.out.println("Average : " +avg);
```

```
}
```

```
}
```

```
